

## Mercury SMS - Version - 1.8

**Mercury SMS Version 1.8**

Release Notification 12 November 2015

A new version of Mercury SMS (version 1.8) will be released on the AppExchange on Thursday 12 November 2015. This notification has been issued to existing Mercury SMS users. It contains an overview of the new features available with this release, along with instructions on how to upgrade to the new version.

**What's new?**

We are very excited to announce some really cool new features that will allow you to get even more value out of using Mercury SMS. You'll find the details of all the new features below.

**Send from Multiple MessageMedia Numbers**

You're now able to authenticate Mercury SMS with multiple MessageMedia accounts. Previously, you were only able to associate one MessageMedia account with Mercury SMS. This enhancement means you will be able to send from any of your MessageMedia SMS Numbers.

You still authenticate your 'Default Account' on the Setup & Configuration page as normal. You will now also have access to the 'Account Manager' page.

Account Name	Username	Password	Remove
0400 123 456	AprikaBusiness002	.....	Delete
Marketing	Accountnew	.....	Delete
Customer Service	AprikaBusiness003	.....	Delete

Buttons: Add Account, Save Accounts

You can also assign a meaningful 'Account Name' such as the physical number (e.g. 0400 123 456) or a descriptive name (e.g. Customer Service).

Your 'Default Account' specified on the Setup & Configuration page, along with any additional Accounts stored in your Account Manager page will be displayed and available when sending Outbound SMS messages.

**Compose Message: Lead** [Send Now] [Send Later] [Select Template] [Cancel] [Preview]

Field: Lead [Dropdown] [--Select Field--] [Dropdown] Merge Text: [Text Field] [Insert Text]

**Send Later Details**

Date/Time: [Text Field] [ 6/11/2015 4:17 PM ]

**Send from any Object (Standard or Custom)**

You will now be able to send an SMS from any Object within Salesforce.com, including Custom Objects. In order to be able to send from any Object, you will need to create a Custom Button and add it to the Object. Instructions for creating these Custom Buttons can be found later in this document.

Note: When sending to an Opportunity, the message is actually sent to the selected Contact Role record(s). When sending to a Campaign, the message is actually sent to the selected Campaign Member(s).

**Send to any Phone Number Field**

When sending Outbound SMS messages, you will now be able to send to any Phone field on the Object that you are sending from. When sending a message manually, you will have the ability to select which Phone field you want to send the message to, as per the illustration below.
